### Objectives and investment policy

The fund is actively managed. The fund is not managed in reference to a benchmark. The objective of the investment policy is to achieve sustained capital appreciation. To achieve this, the fund invests mainly in interest-bearing securities, bond-like dividend-right certificates, money market instruments, convertible bonds and warrant-linked bonds. In addition, up to 20% of the fund's assets may be invested in equities. Up to 10% of the fund's net assets may be invested in warrants on securities. Up to 10% of the fund may be invested in certificates, structured financial products and funds based on commodities, commodity indices, precious metals or precious metal indices, as long as there is no physical delivery of

The selection of the individual investments is at the discretion of the fund management. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. ### Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk

profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 3 because its share price fluctuates comparatively little and the likelihood of both losses and gains is therefore relatively low.
